

AI Character Starter Kit

Create your first consistent fictional AI character in four images.

This free kit gives you the most useful starting pieces from The Viral AI Video Playbook: one master prompt, three supporting reference prompts, and a brief test checklist.

Example of a consistent original fictional character close-up.

Your first five minutes

1. Open a reference-aware image generator.
2. Generate one original fictional character in a clean full-body frame.
3. Approve the face, outfit, shoes and signature accessory.
4. Use THAT exact approved image as the source for each new angle.
5. Check all four references before paying to animate them.

Copy this master-character prompt

01 / Full body

Photorealistic full-body studio portrait of an ORIGINAL FICTIONAL [age]-year-old [type of person]. Face: [distinctive face details]. Build: [height/shape]. Outfit: [signature clothes, colors, footwear and accessory]. Expression: [default expression]. Upright relaxed posture, hands and complete feet visible, front facing, realistic skin and fabric details, even light, neutral studio background, vertical 9:16 composition, one person, no text, no extra people.

Generate the three supporting angles

- Face: Same exact person from chest up. Preserve the face, hair, skin and outfit.
- Three-quarter: Same person turned approximately 35 degrees, full body visible.
- Side: Same person in profile, full body visible, unchanged accessories and shoes.

Before moving to Genjutsu

- ☐ Master face matches the other angles
- ☐ Shoes, clothing and accessories are unchanged
- ☐ Reference source is owned, licensed or otherwise authorized
- ☐ No person or real-world event is deceptively fabricated
- ☐ Your first test is short and has a clear performer

NEXT STEP The complete Viral AI Video Playbook covers Genjutsu mode selection, prompts, error diagnosis, real credit comparisons, upscaling, editing, publishing and monetization strategy. Add your own product link when you publish this free resource: [YOUR PRODUCT LINK].
